

Sixth Grade Study Guide

Chapter 5 Rocks

1. Deposition-
2. Intrusive rock-
3. Sandstone-
4. Organic rock-
5. Clastic rock-
6. Chemical rock-
7. Metamorphic rock-
8. Igneous rock-
9. Sedimentary rock-
10. Porphyry-
11. Cementation-
12. Rock Cycle-
13. Conglomerate-
14. Foliated-
15. What are examples of sedimentary rock?
16. What are the minerals called that make up most of Earth's surface?
17. What is the texture of a rock?
18. What types of rock form from erosion and deposition?
19. Slate is very similar to another rock, what is that rock?
20. What are some examples of igneous rocks?
21. What are the three types of rocks? What does this classification refer to?
22. What drives the movement of the rock cycle?
23. Draw a diagram of the rock cycle and label it. Be able to answer questions about the diagram.
24. How do geologists classify rocks?
25. What is the difference between extrusive and intrusive rocks?
26. What is a coral reef? How is it made?
