

$17 \text{ in} = 1 \text{ ft } 5 \text{ in}$ ↑ Foot

$5'' = \frac{5}{12}'$ or $0 \text{ ft } 5 \text{ in}$

May 9

- measure with ruler
- practice pg. 320, 321
- WBK 7.1 odds

Objective: convert in to ft
& ft to inches

$$\begin{array}{r} 6' 3'' \\ \hline 12 \overline{) 75 \text{ in}} \\ \underline{72} \\ 3 \text{ in} \end{array}$$

$58''$
↳ $4' 10''$

$$\begin{array}{r} 4' 5 \frac{1}{2}'' \\ \hline 12 \overline{) 53} \\ \underline{48} \\ 5 \end{array}$$

$53 \frac{1}{2}$ hold, on set aside

$$5\frac{3}{4}$$

$$5\frac{3}{4}$$

$$5 \times 4 = 20$$

$$\frac{3}{4} \times 4 = \frac{12}{4} = 3$$

$$20 + 3 = 23$$

$P =$ sum of all sides

$$5\frac{3}{4}$$

$$+ 5\frac{3}{4}$$

$$5\frac{3}{4}$$

$$+ 5\frac{3}{4}$$

$$10\frac{6}{4} + 10\frac{6}{4} = 20\frac{12}{4}$$

$$\frac{12}{4} = 3$$

$$20 + 3 = 23$$
